Hi Joe, I have a cmp culvert #2.6 on Pekin Rd. just east of 306 under CEI towers that is failing and need of replacement soon do to road sinking over it. Culvert is to deep and big for my crew. I have contacted CIR and they are coming out to have a look. It is currently 48" and is an area that we have not experienced water back up. Can you please advise on sizing of this culvert and bidding procedure. Thank you.

Gene Layne
