Trustees,

While not a sure thing, this first round passage is a very good sign. I need to relay back to the County Engineer if it is still our intention. Melissa is adding a motion to that effect for Wednesday's meeting.

Re: The County Line Road Improvements  
Russell Township, Geauga County

Dear Mr. Walder,

On or about April 29, 2016, the Engineer's Office received correspondence from the Russell Township regarding your intent to pursue Ohio Public Works Commission (OPWC) funding from the state. Your request included the County Line Road Improvements.

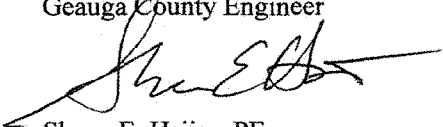

This project request was reviewed, along with many other City, Village, Township and County project requests. Based on preliminary evaluation, your project scored well enough to be recommended for funding to the District Committee. This is only the first step of many in the funding process, but it is encouraging news.

This letter shall serve as notification of the preliminary status and that we will continue to advance your project request for funding. There are several items that will be necessary over the next few months in order to meet the submission requirements. As these items become due, we will assist you in preparation and submitting them.

Please advise that you intend to follow through with your request for funding. State funding is extremely limited and not all applicants will receive funding. If you wish to withdraw your request, please notify us immediately so that we can utilize the funding for another project within Geauga County.

If you have any questions, feel free to contact me.

Joe Cattell, PE, PS  
Gauga County Engineer

Shane E. Hajjar, PE  
Deputy Engineer
